

Introduction to the Time Study Platform

Make Every Minute Count.

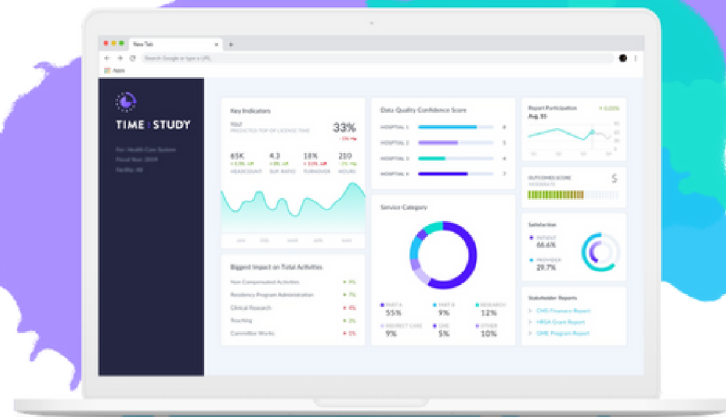

Time Study is the leading platform for conducting time studies in healthcare settings. Our software collects time data in real time for accurate results and detailed reporting. Many of the top US hospitals use our application to make remarkable improvements in workforce effectiveness, operational efficiency, financial performance, and compliance.

TIME STUDY MEASURES YOUR MOST PRECIOUS RESOURCE: TIME

Time Study is a SaaS platform built from the ground up to administer time studies for hospitals. The enterprise-class system has the necessary scalability, accessibility, and security that also ties into existing systems that will serve your organization today and well into the future. The key features include:

- **Business Rules Management System (BRMS)** – Our ‘brain’ where rules and data are configured resulting in consistent data gathering and auditing.
- **Security** is a top priority, so we are SOC2 Compliant and offer SSO to ensure your data is safe and sound.
- **Mobile App** increases compliance to greater than 95%.
- **Import legacy data** so you can compare results gathered before you were using Time Study.
- **Automated reminders** keep practitioners on task so they enter data in a timely manner.
- **Audit logs** record in detail when data was entered and tracks attestations.
- **Flexible time study programs** to meet any use case.
- **Real-time validation** helps practitioners avoid mistakes by checking it as it is entered.
- **Advanced Analytics** tools provide powerful insights.

COSTLY REVENUE LEAKS

1

Leaving millions in unclaimed CMS reimbursements on the table.

2

Employee burnout and turnover.

3

Manual data aggregation processes require the support of multiple FTEs and take months to prepare.

4

Low compliance rates with little to no visibility.

5

Incomplete or nonexistent audit trails putting you at risk.

6

Antiquated solutions and processes that are difficult to administer, support, and enhance.

7

Disparate, disconnected systems and redundant data.

HOW TIME STUDY SOLVES IT

Time Study identifies missing and incomplete information in real-time while improving accuracy and eliminating lag.

Empower administrators and providers to operate top of license by automating reminders. Keep a pulse on employees with excessive (or unsafe) workloads.

Once captured, data can be validated then aggregated with just one click.

Real-time dashboards, reports, and built-in escalation paths provide the transparency and actionable data you need to achieve 100% compliance.

Time Study provides a complete audit trail of all the information captured and processed in our platform.

Simplify and modernize existing processes with Time Study. Average time to go-live is 4-6 weeks, with minimum resources required. Zero percent churn to-date.

Advanced integrations with other systems eliminates redundancy for a comprehensive view.

11+ MILLION HOURS STUDIED AT 75+ HOSPITALS

Time Study proudly serves more than 75 hospitals within the largest healthcare systems nationwide. Our typical client is ranked in the top 10 in their state or region based on the *U.S. News and World Report* rankings.

SUBSCRIPTION-BASED, SERVICE-ORIENTED

Time Study's pricing is license-based with optional advanced services.

CONTACT US

Schedule an ROI analysis for your organization by calling (866) 508-6177 or sending an email to info@timestudy.com.

The software allows us the flexibility to concentrate on other reimbursement matters while spending minimal time tracking and managing the time study data management and reporting process.
